

Horizon Configuration and Integration

The Best Start for Your Supervisory System

CANBERRA's Horizon Configuration and Integration Service jump starts your supervisory system. Our experts will configure the system specific to your equipment and provide diagnostics to ensure that the entire system is functioning properly right out of the box.

SERVICES INCLUDE

Horizon Configuration:

- > Installation of SQL Server 2008 Standard Edition, and the Horizon Software on the ordered Computer PC.
- > Creation of the Site-Specific Tables. A number of tables are created which contain information about what devices, sensors, groups, etc. that is part of the system.
- > The tables will be setup for the quoted equipment.

Horizon Integration and Test:

- > Integration of site specific tables into the database on the ordered Computer PC.
- > Testing to assure that Horizon is setup properly and the communication is on order.
